

# National Indian Health Board

## GRASSROOTS – SIGN UP!

The National Indian Health Board (NIHB) is the principle advocate on behalf of American Indian/Alaska Native health care and is the point of action for the legislative strategy, political activities and advocacy that are important to you and your Tribe's health care priorities. It's vital that Congress hears from you on issues you care about, so please help us keep you informed about and engaged in the political process!

Here are just a few of the issues NIHB works on for you:

- Reauthorization of the Indian Health Care Improvement Act
- Reauthorization of the Special Diabetes Program for Indians
- Indian Health Service (IHS) and Interior appropriations and supplemental funding
- Department of Health and Human Services/IHS Budget consultation

In order for NIHB to represent the interests of Indian Health, we need to hear from you about what is important. We want to keep you informed about pending legislative and political issues so that you are armed to call congressional representatives when needed and influence legislative outcomes.

Below please provide your contact information so that we may keep you up to date on legislative items of interest to you as an Indian Health Advocate. Thank you for helping us advocate for better Indian health care!
