NIHB Webinar: COVID-19 Contact Tracing in Indian Country

July 10th, 2020
Amy Dixit & Carolyn Parshall
Albuquerque Area Southwest Tribal Epidemiology Center
What is contact tracing?

[Diagram showing steps of contact tracing]

1. Patient Isolated & Provided Care
   - Contact shows symptoms & is isolated, tested & provided care.

2. Patient asked about contacts.
   - If no contacts, no further spread of the disease.
   - Contacts watched for symptoms for a certain number of days.
   - Cycle repeats until there are no new patients.

3. Contacts will be watched for symptoms for a certain number of days.
   - Missed contact may spread disease to new contacts.
   - Patient asked about contacts.
   - Public health system works to eliminate missed contacts.

AASTEC's contact tracing efforts

- Getting started
- Teams
- Case investigation
- Contact tracing
- Monitoring
  - Contact monitoring
  - Case monitoring
- Reporting
Lessons Learned
Tools and Resources

We still need to stay home & away from crowded spaces to keep COVID-19 from spreading & harming our Peoples.

LOVE
My heart speaks to your heart, even though we are far apart. We will be together again.

LOVE
I wear this face mask every time I leave my home TO PROTECT MY LOVED ONES.

CLOTH FACE COVERINGS DO’S AND DON’TS:
- Make sure you can breathe through it
- Wear it whenever going out in public
- Make sure it covers your nose and mouth
- Wash after using
- Do not use on children under two years old
- Do not use surgical masks or other PPE intended for healthcare workers
