DO choose masks that

- Have two or more layers of washable, breathable fabric
- Completely cover your nose and mouth
- Fit snugly against the sides of your face and don't have gaps
- Have a nose wire to prevent air from leaking out of the top of the mask

DO NOT choose masks that

- Are made of fabric that makes it hard to breathe, for example, vinyl
- Have exhalation valves or vents, which allow virus particles to escape
- Are intended for healthcare workers, including N95 respirators
