Dear Subscribers,

Don't forget about today's webcast of CDC's Public Health Grand Rounds, entitled *The Science Base for Prevention of Injury and Violence*, which will be streamed live from CDC headquarters today at 1 p.m. (EST) at www.cdc.gov/about/grand-rounds, with an archived video being made available by January 21.

As we commemorate the 20th Anniversary of [CDC's Injury Center](https://www.cdc.gov/injury/index.htm), this session of Public Health Grand Rounds will explore the role of public health in the prevention of injury and violence, and provide a comprehensive picture of the science of injury and violence that has been used to develop and implement solutions such as suicide prevention programs in Oregon and the adoption of the .08 blood alcohol limit for U.S. drivers.

**Presented By:**

**Linda C. Degutis, DrPH, MSN**
Director, National Center for Injury Prevention and Control, CDC
“Injury and Violence Prevention: The Role of Public Health in Building the Science Base and Translating Science to Practice”
