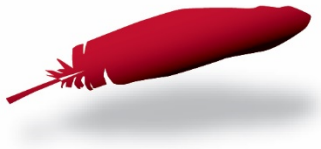
National Indian Health Board



Aligning TOR and TBHA Activities Worksheet

Think about the activities that you discussed and mapped out earlier, and record them below. If you have a long list, then please only select the 5-7 most significant activities. Using the list provided, write down the number of the TOR activity that this activity addresses. Then read through the list of TBHA strategies, and record the strategy or strategies that this activity addresses. Please do not complete the columns on partnerships. Your group will fill out the columns representing current and potential partners in the next activity.

Current or Planned Activity	TOR Activity	TBHA Strategy	Current Partners/Collaborators	Potential Partners/Collaborators
