Program Logic Model Example I

**Problem Statement**
What behaviors, factors, and determinants put what population at what risk?

**Inputs**
What resources will be used in the intervention? (e.g., money staff, curricula, materials)

**Activities**
What services will the intervention provide to accomplish its objectives? (e.g., outreach, counseling sessions, group sessions, workshops, trainings, materials distribution)

**Outputs**
What will be the direct products or deliverables of the intervention? (e.g., intervention sessions completed, people trained, tests conducted, materials distributed)

**Immediate Outcomes**
What will be the immediate results? (e.g., changes in determinants such as knowledge, attitudes, beliefs, and/or skills)

**Intermediate Outcomes**
What results are expected occur longer term? (e.g., changes in behaviors and environmental conditions)

**Impact**
What are the expected long-term results over time? (e.g., changes in HIV infection rates, morbidity, and mortality)
