Special Diabetes Program for Indians:

Saving lives in Massachusetts and providing a strong return on federal investment

History

Congress established the Special Diabetes Program for Indians (SDPI) in 1997 to address the growing epidemic of diabetes in American Indian and Alaska Native (AI/AN) Nations. By allowing Tribes to determine their own approach, the program has become the nation's most effective federal initiative to combat diabetes and serves as a useful model both for diabetes programs nationwide and public health programs in Indian Country. SDPI is currently authorized through Fiscal Year 2023.

SDPI Outcomes

PROGRAMS IN 35 STATES Between 2013 and 2017 15.4% END STAGE RENAL DISEASE REDUCED BY

Between 1999 and 2013- the greatest decline of any racial or ethnic group.

TRIBES COLLECT DATA AND HAVE **DOCUMENTED THAT** THIS INVESTMENT IS **BOTH SAVING LIVES** AND THE FEDERAL HEALTHCARE SYSTEM MONEY!

14.6%

MEDICARE FOR EACH PATIENT KEPT OFF CHEMODIALYSIS

000 IN SAVINGS FOR

SDPI Impact

SDPI provides a strong return on federal investment and is saving lives in Massachusetts. Since the beginning of SDPI, blood sugar levels have decreased, risk factors of cardiovascular disease have been reduced, diabetes-related kidney disease has been cut by more than half, and primary prevention and weight management programs for Native youth have increased. Nation-wide AI/AN diabetes prevalence decreased from **15.4%** to **14.6%** between 2013 and 2017. National data reflect the excellent outcomes in Native Nations resulting from innovative local level programs.

Diabetes in Massachusetts

FY 2023 SDPI funding in Massachusetts totaled \$168,316 for 2 **Community Directed Grant Programs:** Mashpee Service Unit

Wampanoag

According to the American Diabetes Association, approximately 476,687 people in Massachusetts – 8.4 % of the population – have diagnosed diabetes, and many suffer from serious diabetes-related conditions such as heart disease, neuropathy, and eye, foot and skin complications. An additional 1.7 million—31.8 % of adults— have prediabetes. In addition to the human toll diabetes places on the people of Massachusetts, it also places a large financial burden on the state's healthcare system. According The staggering estimate of cost of diabetes in Massachusetts was approximately \$7.6 billion.
