Allowable Medicaid Telemedicine Features State-by-State Summary	40

INTRODUCTION

The Centers for Medicare and Medicaid Services (CMS) Behavioral Health Service Provider Report (“the Report”) was created to identify the Medicaid behavioral health provider types in the 37 states¹ where health programs are operated by the Indian Health Service (IHS), Tribes and Tribal organizations, and Urban Indian Health Programs (UIHP), collectively referred to as ITUs or Indian health care providers.

Many Indian health care providers offer behavioral health services but currently do not bill Medicaid. The Report will help Indian health care providers hire behavioral health providers that meet Medicaid licensure and/or certification requirements in order to bill Medicaid and receive reimbursement. Indian health care providers must meet the enrollment requirements of their respective Medicaid agency and that process varies from state to state. The Report does not address state specific enrollment processes. For state specific information, please visit www.medicaid.gov to locate your state Medicaid website and more information about the provider enrollment process.

REPORT CONTENTS AND ORGANIZATION

The Report analyzes the 37 states with Indian health care providers and identifies Medicaid reimbursable, non-physician providers of behavioral health services. Because physicians are uniformly qualified practitioners that are eligible to submit claims for reimbursement in all states, they are not included in the state summaries.

The 37 state summary tables list Medicaid behavioral health practitioners identified in state reference

materials, along with the typical minimum educational requirement for the position (degree and field of study). The sources of information were mostly state and Tribal Medicaid or Medicaid behavioral health plans, billing guides, fee schedules and related state rules and statutes.

The Affordable Care Act (ACA) allows states the option to expand Medicaid eligibility to uninsured adults and children whose incomes are at or below 138% of the federal poverty level (FPL). As of this date, 34 states and D.C. have expanded Medicaid. Of the 37 states identified in this Report, 22 have expanded Medicaid. The state summary table indicates which states have expanded Medicaid – those states that have expanded Medicaid are in green and states that have not are in orange. Medicaid expansion, in conjunction with other federal laws, increases access to behavioral health services and enables Indian health care providers to increase Medicaid reimbursement for behavioral health and substance use disorder services.

The state specific summaries contain links to primary sources of information located on state specific Medicaid websites. Users of the Report are encouraged to access the web-links provided in this document to confirm that information presented in the tables is up to date.

A summary table of reimbursable Medicaid telemedicine services for each state is also included at the end of the state tables. This information was obtained from the Center for Connected Health Policy’s State Spring 2018 Telehealth Laws and Reimbursement Policies document.

¹ Alabama, Alaska, Arizona, California, Colorado, Connecticut, Florida, Idaho, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Montana, Nebraska, Nevada, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Virginia*, Washington, Wisconsin, Wyoming

TRIBAL SPECIFIC PROVISIONS

There are several important Tribal specific provisions related to behavioral health services provided by Indian health care providers.

Federal Medical Assistance Percentage (FMAP)

Title IV of the Indian Health Care Improvement Act, Public Law 94-437, amended title XIX of the Social Security Act to authorize a facility of the Indian Health Service (including a hospital, nursing facility, or any other type of facility which provides services of a type otherwise covered under the State plan), whether operated by such Service or by an Indian tribe or tribal organization (as those terms are defined in section 1603 of title 25), to be eligible for reimbursement for medical assistance provided under a State plan if and for so long as it meets all of the conditions and requirements which are applicable generally to such facilities under this subchapter. 42 USC 1396j.

Nondiscrimination under Federal health care programs in qualifications for reimbursement for services

(a) Requirement to satisfy generally applicable participation requirements

(1) In general A Federal health care program must accept an entity that is operated by the Service, an Indian tribe, tribal organization, or urban Indian organization as a provider eligible to receive payment under the program for health care services furnished to an Indian on the same basis as any other provider qualified to participate as a provider of health care services under the program if the entity meets generally applicable State or other requirements for participation as a provider of health care services under the program.

(2) Satisfaction of State or local licensure or recognition requirements Any requirement for participation as a provider of health care services under a Federal health care program that an entity be licensed or

recognized under the State or local law where the entity is located to furnish health care services shall be deemed to have been met in the case of an entity operated by the Service, an Indian tribe, tribal organization, or urban Indian organization if the entity meets all the applicable standards for such licensure or recognition, regardless of whether the entity obtains a license or other documentation under such State or local law. In accordance with section 1621t of this title, the absence of the licensure of a health professional employed by such an entity under the State or local law where the entity is located shall not be taken into account for purposes of determining whether the entity meets such standards, if the professional is licensed in another State. 25 USC 1647a

Licensing

Licensed health professionals employed by a tribal health program shall be exempt, if licensed in any State, from the licensing requirements of the State in which the tribal health program performs the services described in the contract or compact of the tribal health program under the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.). 25 USC 1621t

DISCLAIMER

Please note that this document is for informational purposes only and is not intended as a comprehensive statement on this topic. It is not to be relied upon as authoritative guidance. The Report does not take the place of Medicaid behavioral health guidance documents, such as related manuals, billing guides, fee schedules, and familiarity with applicable rules and statutes. At the state level, there is significant variability in approaches to organization, detail, and documentation of Medicaid behavioral health programs. To some degree, this document reflects this variability.

ALABAMA

Medicaid Expansion State: No

Non-Physician Eligible Providers

ALABAMA PROVIDER TITLE	TYPICAL MINIMUM DEGREE (FIELD)
Psychologist	Doctorate (Psychology)
Licensed Psychological Technician	Masters (Psychology)
Pharmacist	Doctorate (Pharmacy)
Physician Assistant [PA]	Completion (PA Program)
Certified Registered Nurse Practitioner [CRNP]	Masters (Nursing)
Psychiatric Nurse	Masters (Psychiatric Nursing)
Registered Nurse [RN]	Completion (RN Program)
