

Indian Health Service

Pharmacy Point of Sale (POS) Billing: A Revenue Cycle Team Member

LCDR MICHAEL HUNT, DPH

MAY, 2026

Learning Objectives:

1. Explanation of pharmacy point of sale (POS) billing
2. Identification of POS Daily Tasks that should be performed
3. Realize the impact pharmacy POS can make on your budget
4. Look at department functions within the revenue cycle
5. Highlight communication between departments for success

....other Objectives include....

- Join in by asking/answering questions
- Have fun
- Stay awake!!! 😊

First of all...

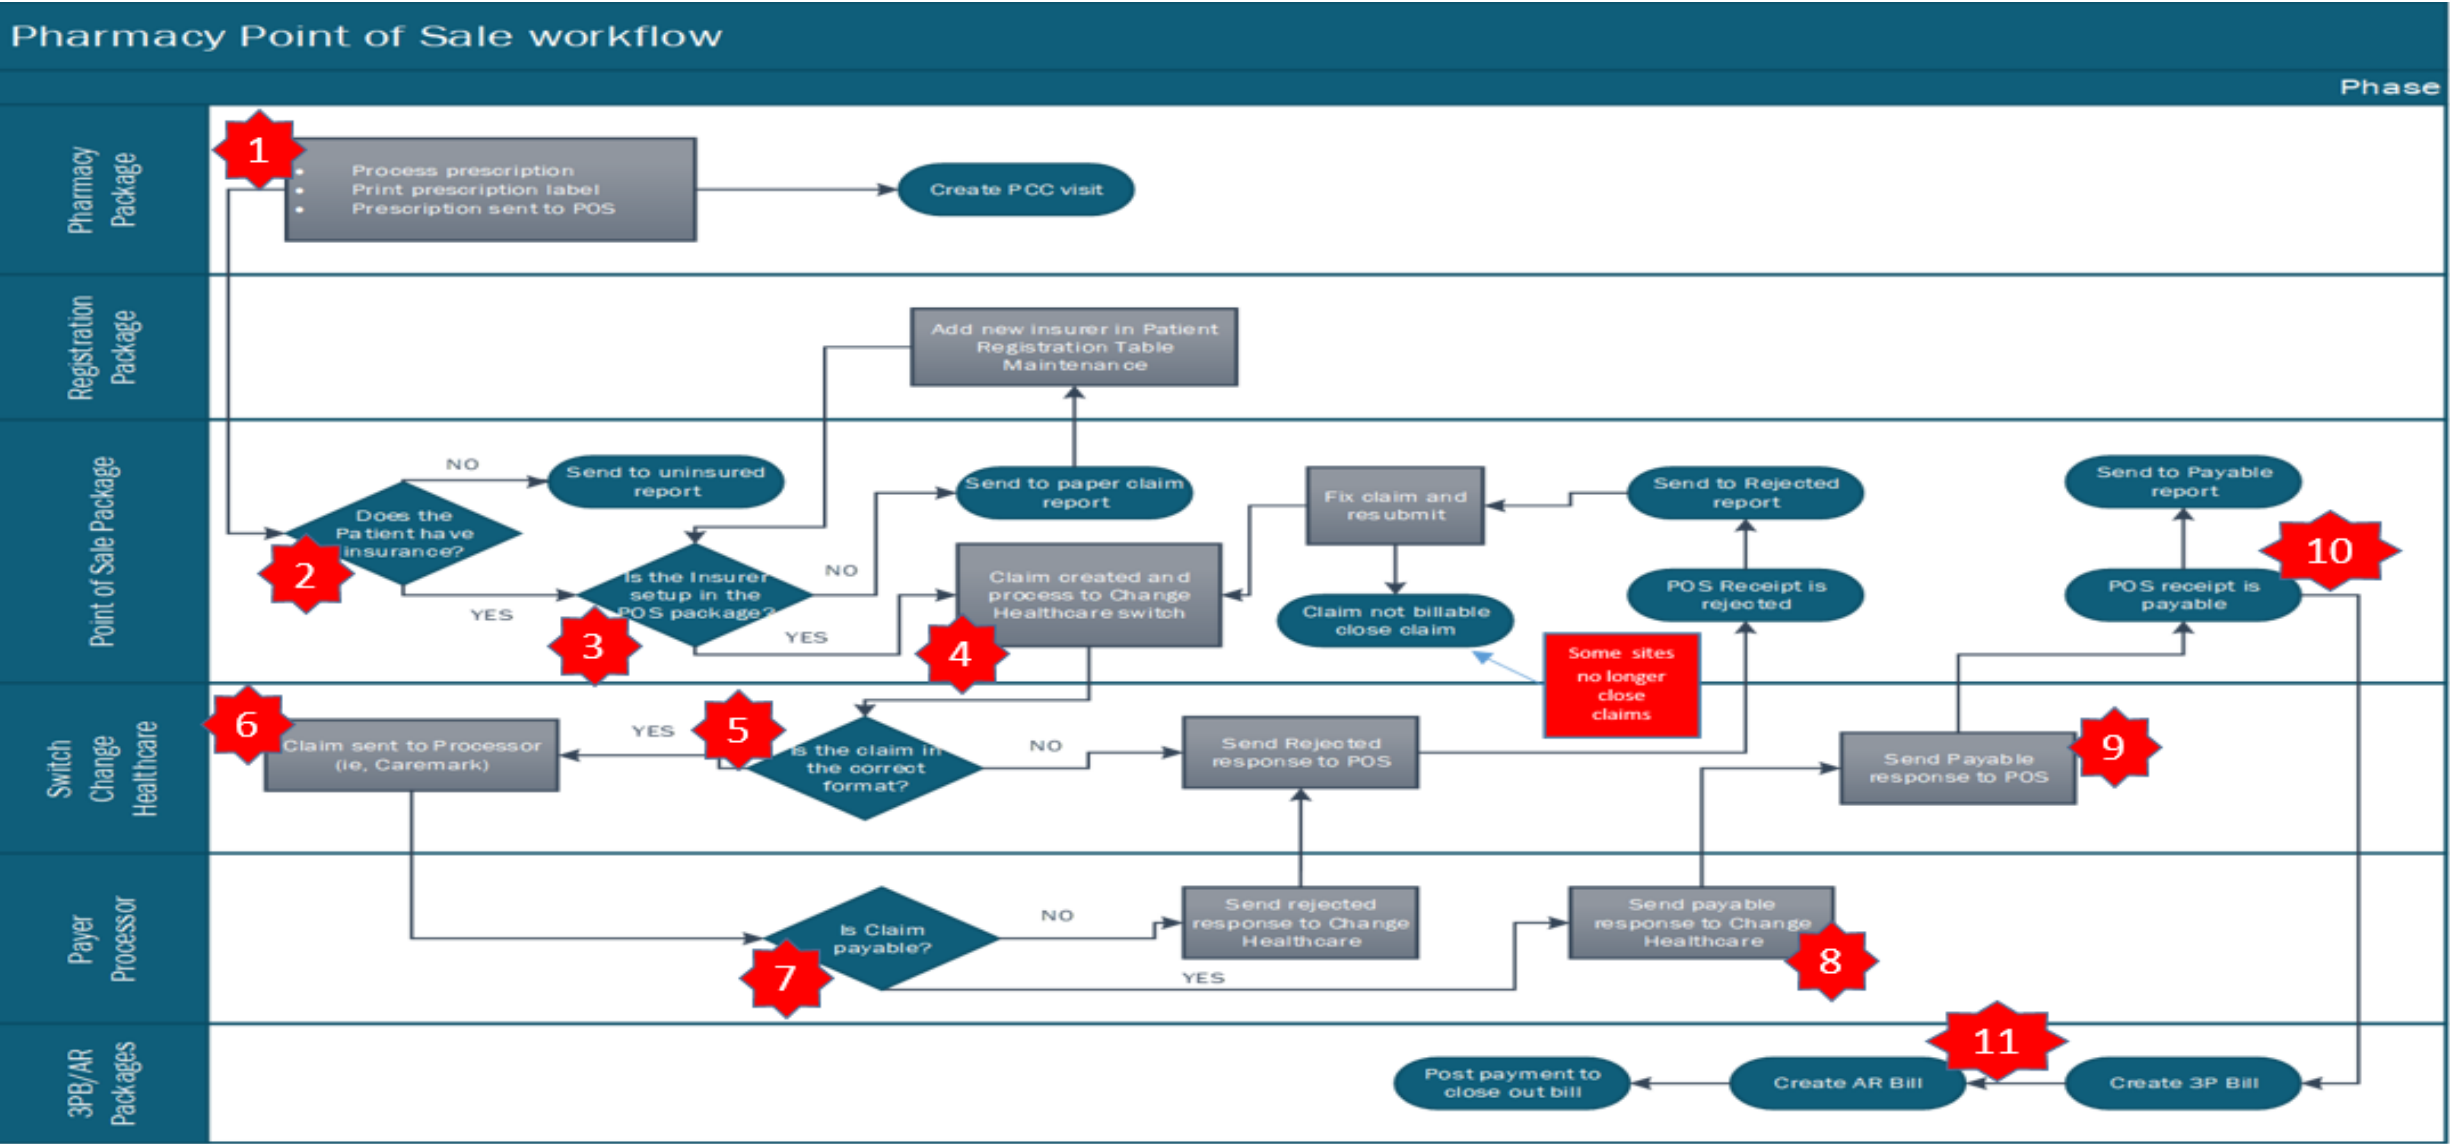

what is pharmacy point of sale (POS) billing?

Pharmacy POS billing is performed when a prescription is processed for a patient that has prescription insurance entered in their patient file. Unlike medical billing that may be delayed, pharmacy POS billing happens via the internet within seconds when filled at the pharmacy, or....at the 'point of sale'.

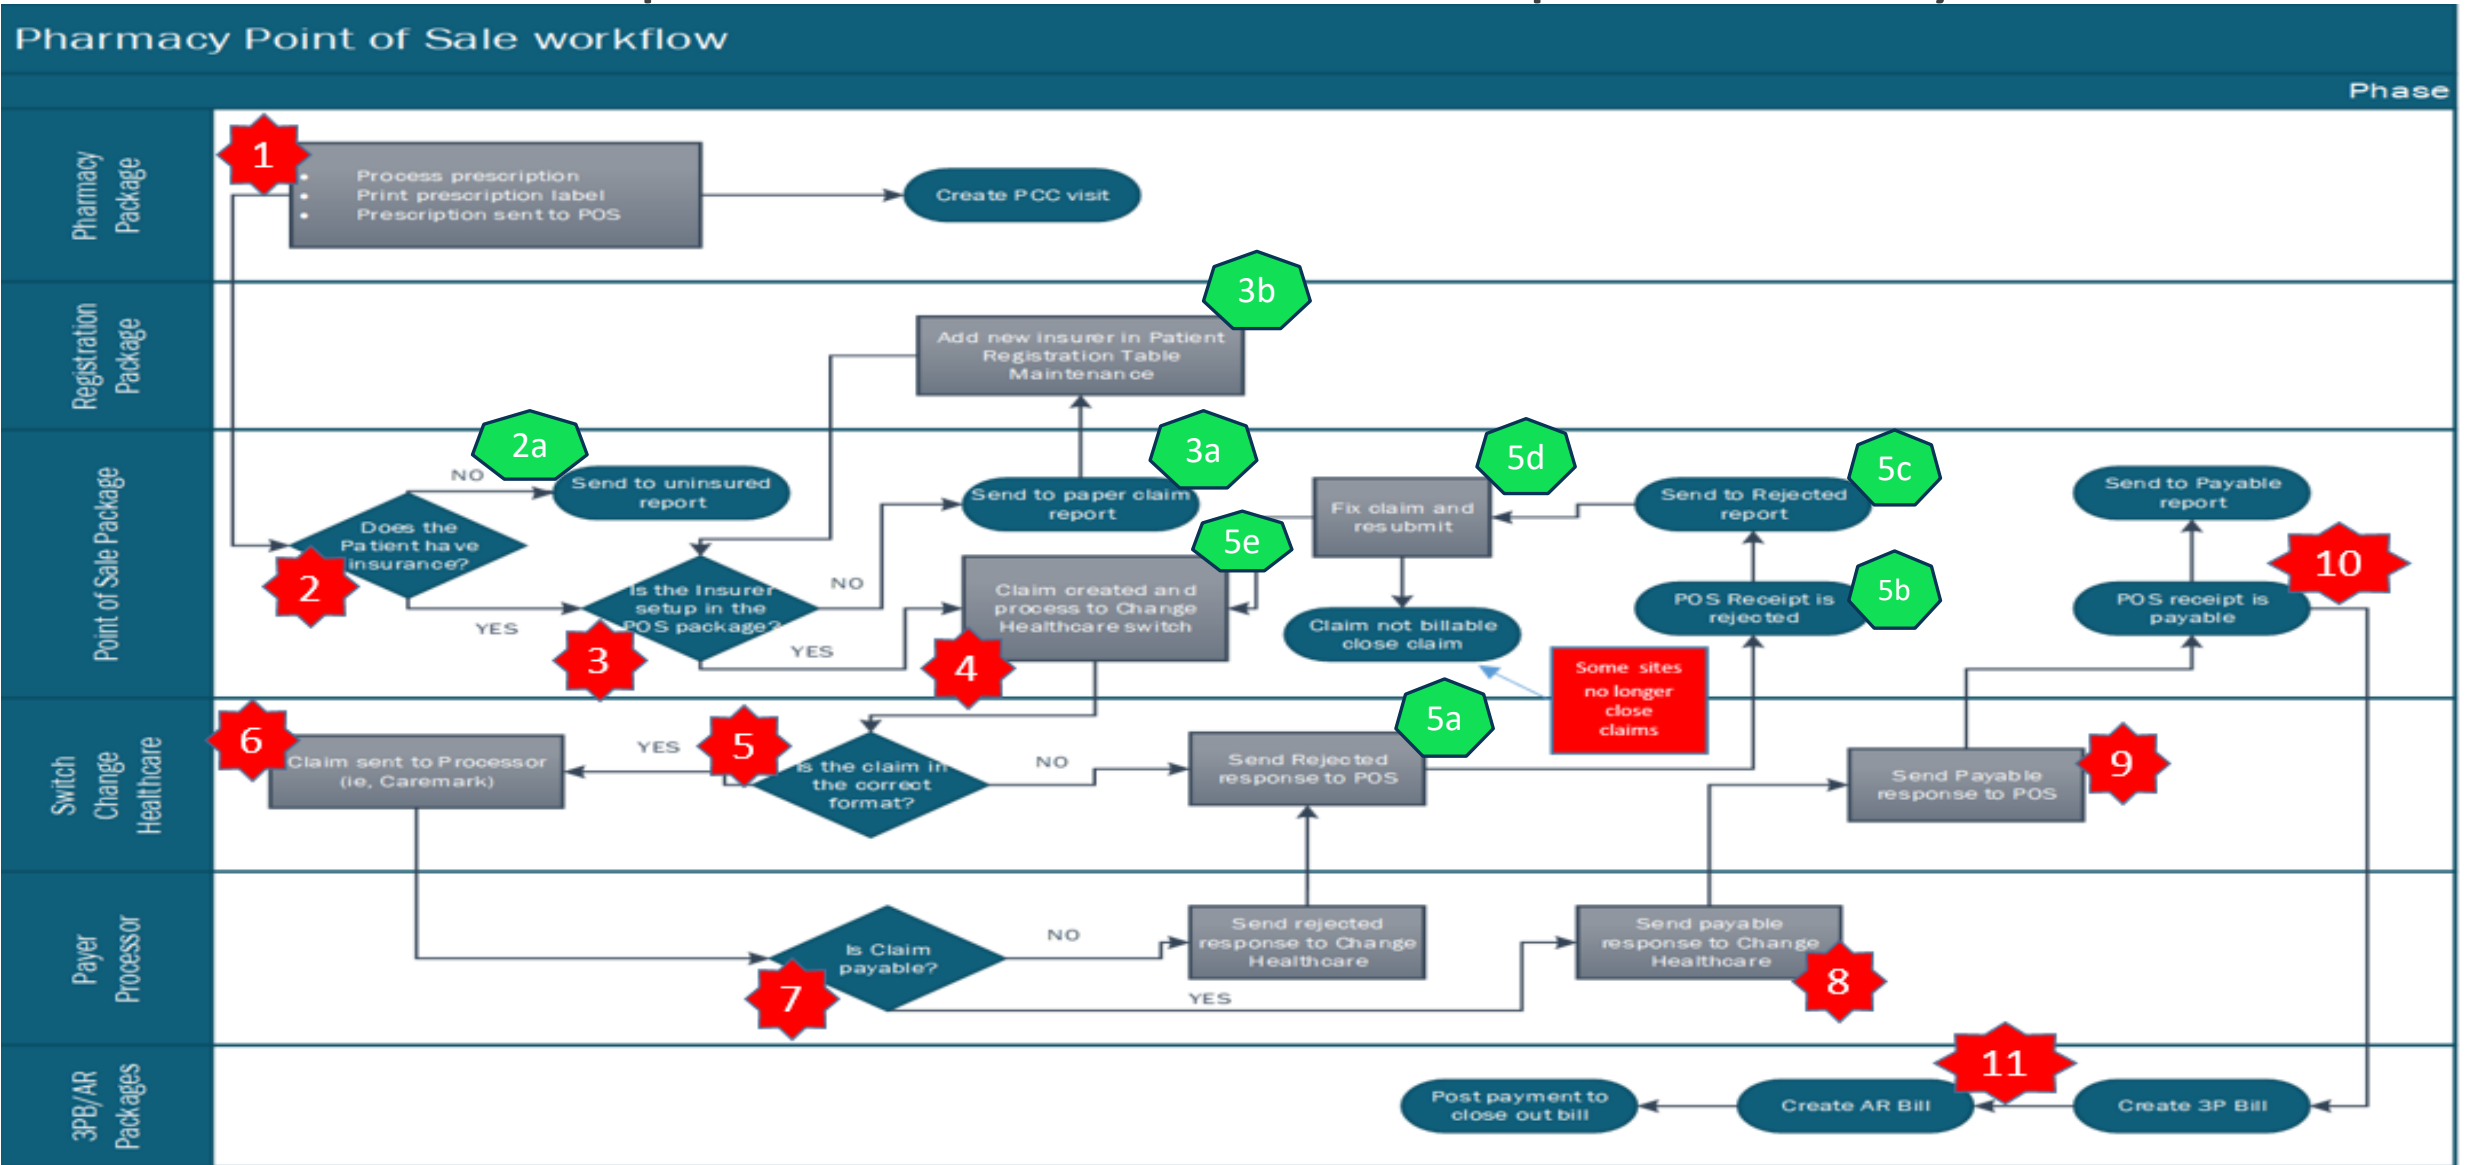

This immediate POS billing got its name in the retail pharmacy sector. It allows pharmacies to receive a response from the insurer that includes the amount paid by the insurer and the amount to charge the patient as their copay.

Thankfully, IHS does not charge patient copays. 😊

Path of a PAYABLE pharmacy POS claim

Additional steps with a REJECTED pharmacy POS claim

Individual claim receipt shows paid amount

Paid claim totals for a date range can be seen on the DAY report

```
Authorization Number: 2524111305783
Basis of Reimb Determination: Not specified
Dispensing Fee Paid: $ 0.00
Ingredient Cost Paid: $ 719.00
Medication Order: 1
Patient Pay Amount: $ 0.00
Prescription/Service Ref Num: 3282442
Prescription/Srvc Ref Num Qual: 1
Response Status (Prescription): P
Total Amount Paid: $ 719.00 One paid claim
Transaction Response Status: CLAIM PAYABLE
Done
```

```

Impact of Third Party Dollars on Budget

Total Clinton Service Unit (CSU) budget for 2023 was \$57.9 million.

- \$29.3 million from IHS funding
 - PRC is included in this and is \$16.3 M of this total
- \$28.6 million from third party collections (Medical + Pharmacy)
 - **\$17.7 million from Pharmacy Point of Sale (61% of total collections)**

Pharmacy POS Collections equal about 30% of the total budget for CSU.

This means that without pharmacy POS dollars, almost a third of *everything* would not be available.

Why do these efforts matter?

Indian Health Service Mission:

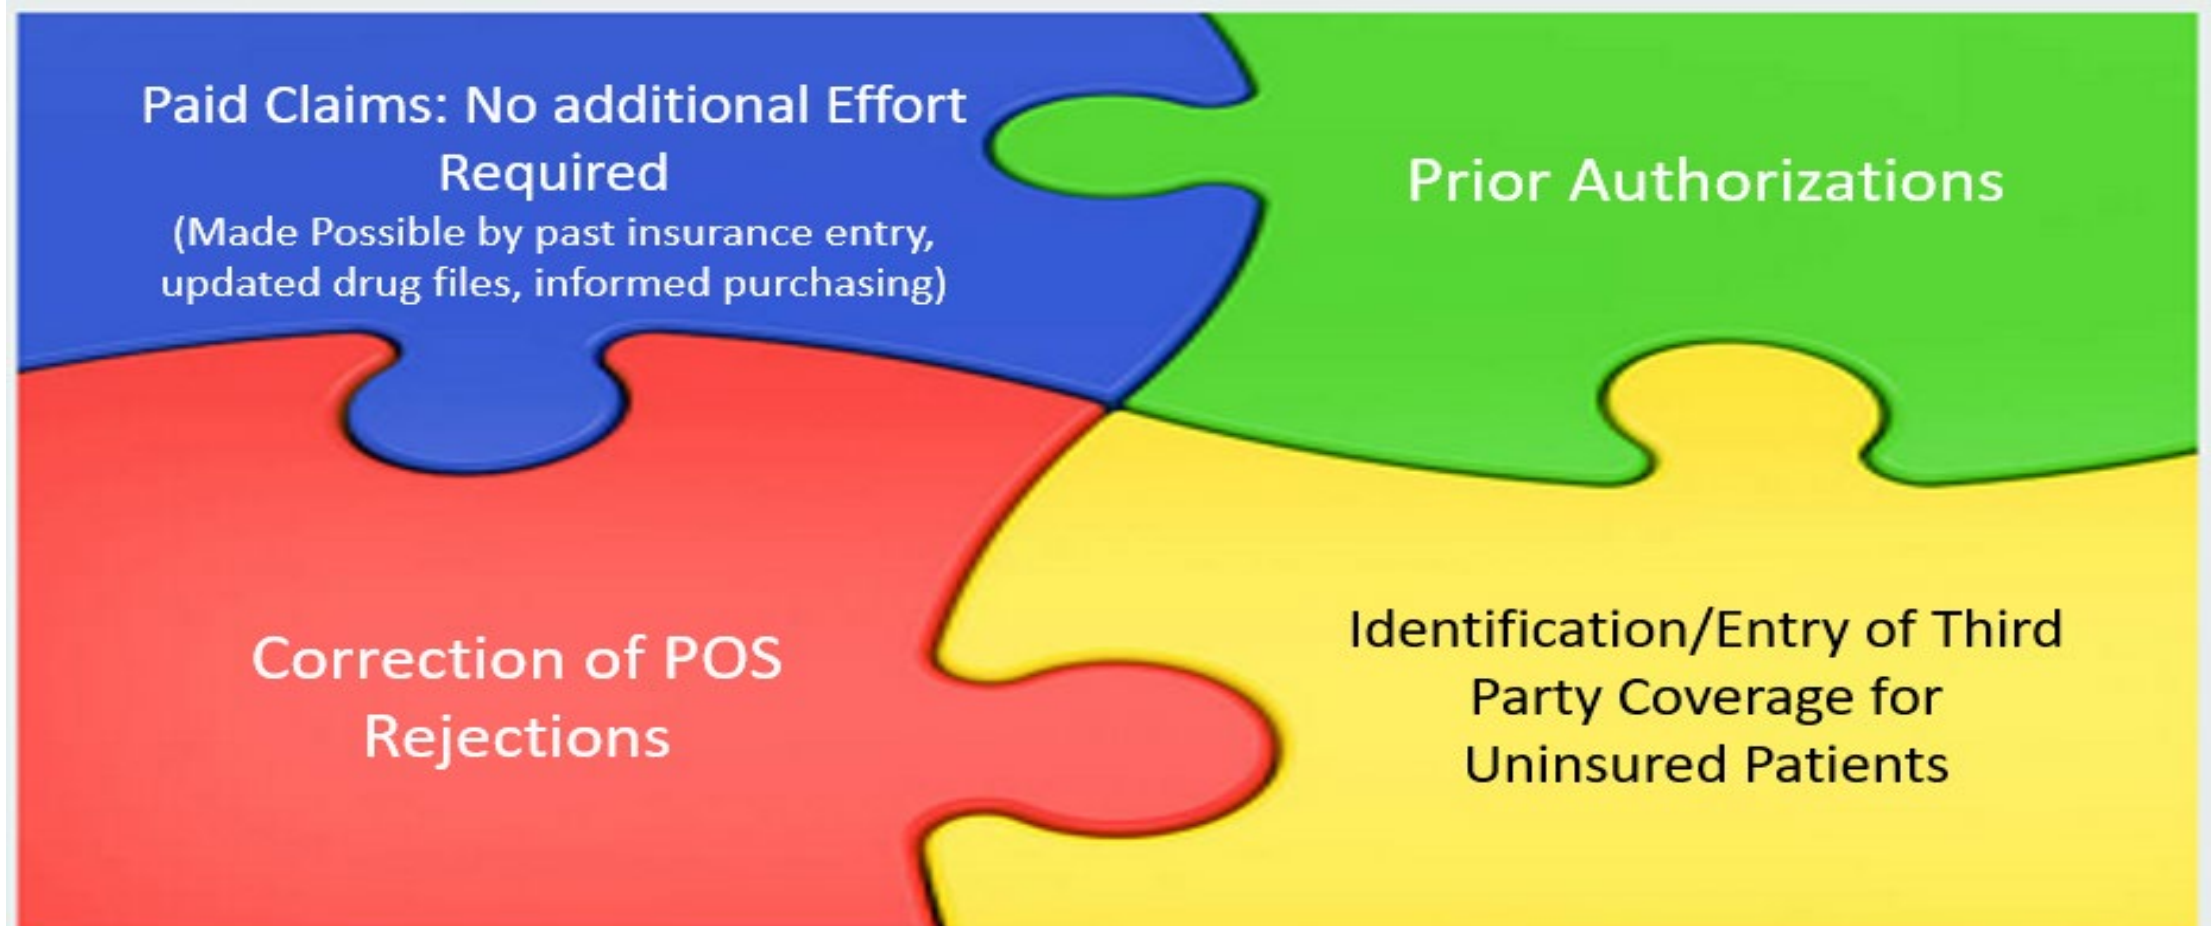

The overall mission of the Indian Health Service (IHS) is to raise the physical, mental, social and spiritual health of American Indians and Alaska natives (AI/AN) to the highest level.

Indian Health Service Goal:

The main goal of IHS is to assure that comprehensive, culturally acceptable personal and public health services are available and accessible to AI/AN people.

Main pieces of the pharmacy POS puzzle

Medicare Part B

VA Billing

Version 3.6 (Updated April 20, 2024) Created by LDCR Michael Hunt, Clinton Indian Health Center, Clinton, OK

Create your Pharmacy POS Game Plan

Daily Tasks:

- **Run reports:** Run URM to update report master file, identify stranded/duplicate/paper claims that need attention and identify rejected claims that need worked
- **Work rejections:** once identified, correction of claims can result in PAID claims
- Initiate/complete **Prior Authorizations (PAs):** These are identified while working rejections
- **Reverse negative-copay claims:** prevents deductions from checks received from insurers
- Advise **ordering of billable products** and updating of drug filed for proper billing (avoid repacks, if possible)

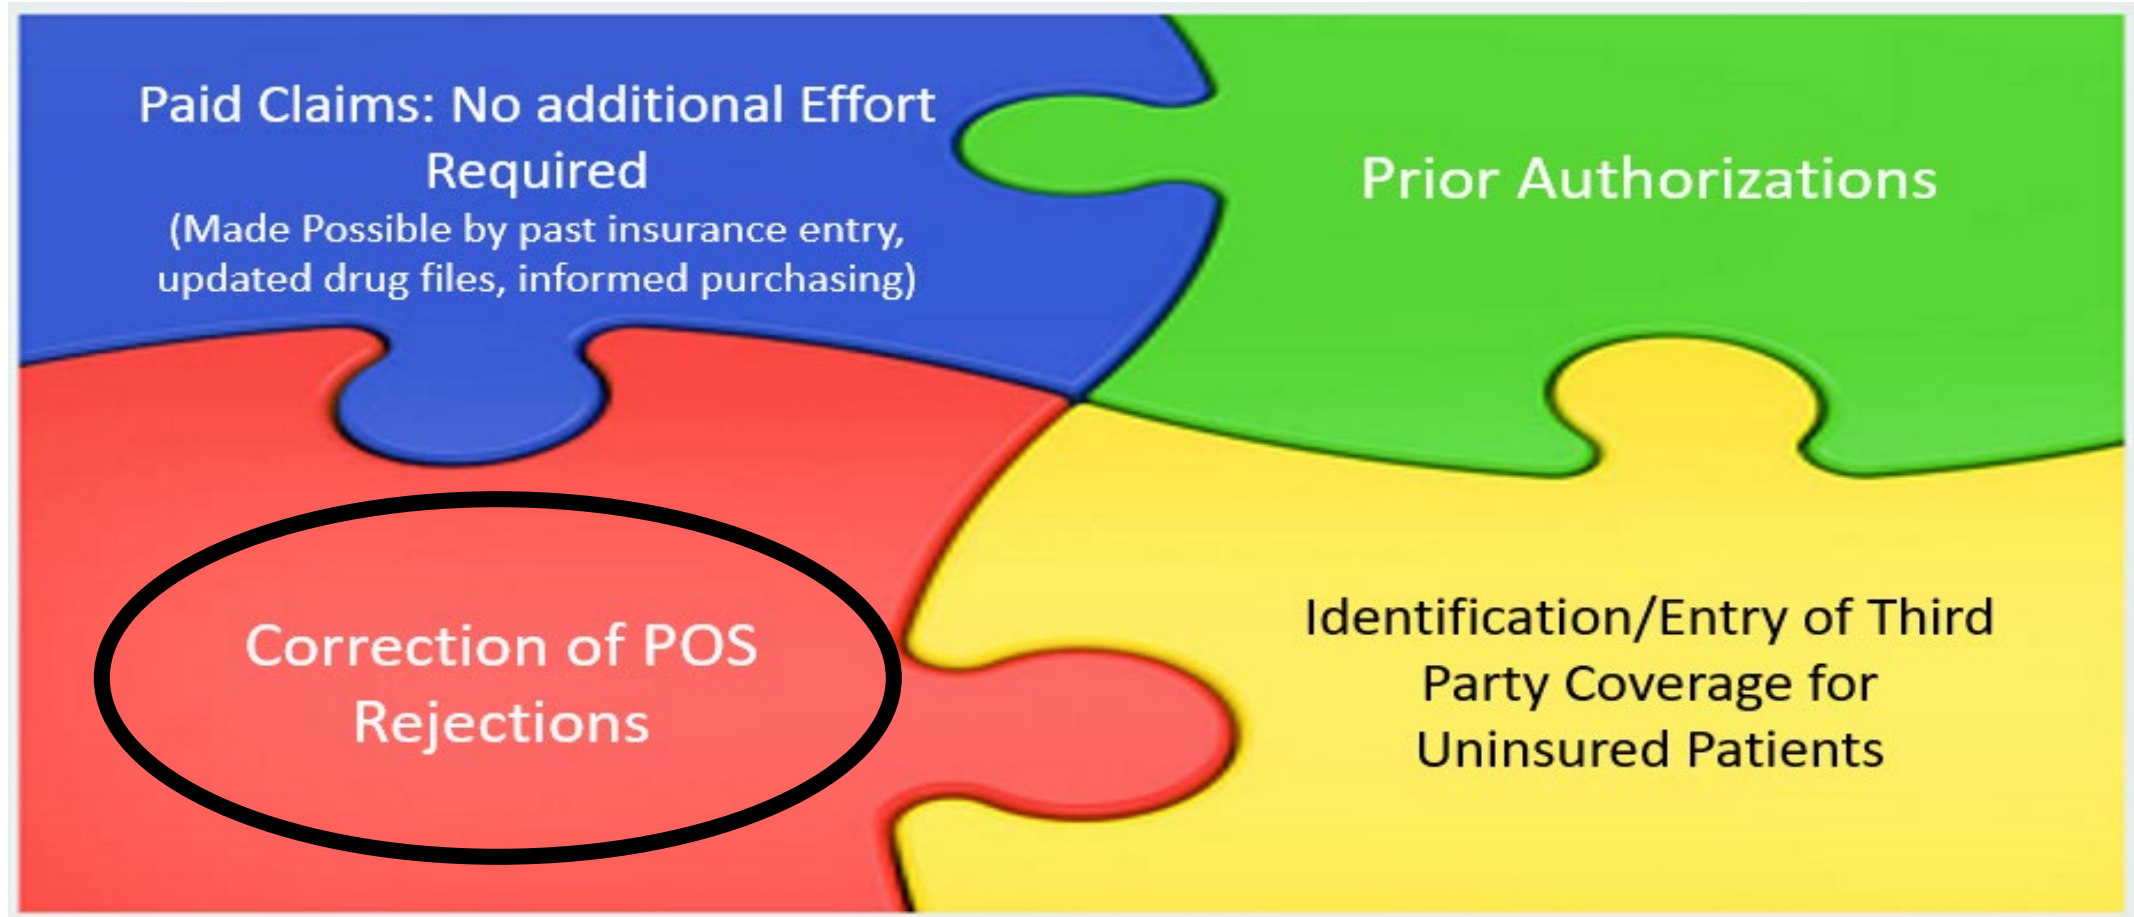

Weekly or Monthly:

- Review paper claim report, missed opportunity report, released/unreleased report
- Search for and **add insurance for uninsured patients**
 - Back-bill claims on newly found insurance (90 – 180 day back-bill window)

Daily Pharmacy Point of Sale Reports

- URM** **Update Report Master File for a date range**
- DAY Totals-by Released Date (Run BEFORE working rejections)
- DUP** **Duplicate Claims Report**
- STR** **List possibly stranded claims**
- RCR** **Rejected Claims by Reject Code, or**
- Fileman** **Negative Copays**
- URM Update Report Master (Repeated AFTER working rejections)
- DAY Totals-by Released Date (Run AFTER to working rejections)

#1: Correction of Rejections

Identifying and working POS rejections

Rejected Claims Report (RCR)

- Uploaded into RRIP to convert claims to Excel
 - (RRIP (RPMS Report and Information Processor) created by CAPT Sparrow)
1. Review each rejection to determine if it is fixable
 2. **REJECT LIST** tab on the POS Tutorial gives common resolutions for each type
 3. The **FIXING A REJECTION** tab gives step by step directions to correct claim

[Eligibility Search](#)

[Setup of In](#)

POS Tutorial REJECT LIST Tab:

Identifies how to resolve each rejection type

For rejection types, you would locate your reject in the first column, then the second column lists the most common ways to fix that type of rejection. It will give you a good starting point when learning how to work your rejections.

First, locate your reject code.	Second, read possible reasons for rejection and follow guidance on how to resolve.
POS Rejection	Possible Reasons for Rejection
7X:Days Supply Exceeds Plan Limitation	1. Prescription may be for a greater day supply than insurance allows. Check receipt. Order may need changed to fill just a 30 day supply of medication. 2. Actual day supply on insulin may exceed 30 day limit by insurance. On these, we enter the prescription order as the ACTUAL DAY SUPPLY for the quantity being dispensed. If the claim rejects and the box can not be broken (insulin vial/pens, inhalers, etc.) we call the insurer for an override and, if instructed to do so, resubmit with the day supply allowed and make an EHR chart note to reflect the reason.
84:Claim Too Old	Noncontrolled prescriptions are good for 1 year. C III-V are good for 6 months. CII prescriptions are good for 30 days (in Oklahoma). This is usually only a problem if prescriptions are suspended for CMOP when it is suspended for a future fill date that is past the prescription expiration date. Also on CMOP prescriptions, fill dates will update in RPMS when CMOP actually fills the prescription, which could be 1-3 days after the date it was actually processed at your site. Either way, there is no way to fix it after the fact. Prescriber will need to enter a new order.
85:Claim Not Processed	Just need to RESEND the claim in POS. Caused if either your site or the insurer is having internet issues at the time of filling.
88:DUR Reject Error	Could be many reasons. Must check claim receipt. 1. Refill too soon: claim receipt will give next fill date. 2. DUR codes may need to be entered for override after consulting pharmacist/provider. See DUR CODES section of CODES sheet at the bottom of this document for instructions. 3. Rx could exceed the number of doses per day allowed by that insurance. Verify quantity and day supply are correct. May only be able to bill for the allowable amount (i.e. 30 tablets for 30 days, or whatever the limitation is).
8S: Basis of Cost Determination Value Not Supported	Go into Advance Setup of Insurer(*ADV) and change the value of field 423 Special code from 0 to 07. EXAMPLE OF HOW IT SHOULD LOOK: SPECIAL CODE: S ABSP("X")="07" See SETUP OF INSURER tab for special codes.
891:Days Supply Is Less Than Plan Minimum	Check the receipt. If the claim is Express Script/Medco and says SUBMT 90DS OR OVD w/08/0891 w/SUBMTD DS in the receipt, you will override by going up to Ask Preauth and enter YES, then enter 8 in prior authorization tv0el(Paver defined exemption). and 0891 in the Prior Authorization ID field. then resubmit.

Next, the **Fixing a Rejected Claim** tab

Gives step by step directions on how to fix rejected claims

Correcting a Pharmacy Point of Sale (POS) rejection in RPMS

For additional training materials on Fixing a Rejected Claim, go to [ABSP Pharmacy Point of Sale](https://www.ihs.gov/rpms/training/course-materials/)
<https://www.ihs.gov/rpms/training/course-materials/>

Once you have your rejections from your RCR report uploaded into the RRIP processor (see **DAILY TASKS** tab, #4 under Daily Tasks), and have visited the

First, go to Pharmacy Point of Sale and select #1.

```
Select Core Applications Option: ^pos

```

Then: U Claims data entry screen

```
U  Claims data entry screen...
RPT Pharmacy electronic claims reports ...
```

Correcting Rejected Claims: Impact on Collections

Results vary depending on site's volume, prescribing habits, etc.

To track impact:

When working POS rejections, the DAY report can prove your worth

1. Run URM report
2. Run the DAY at the start of the day prior to working rejections
3. Work all the rejections.
4. Run your URM after working rejections to total up your reports within RPMS
5. Run the DAY at the end of the day after working rejections
6. Subtract the End of the day total from the Start of the day total to see how much you gained by fixing rejected claims.

Example: Clinton Service Unit January 2024

2024	<u>DAY total BEFORE claim correction</u>	<u>DAY total AFTER correction</u>	<u>Increase from Claim Correction</u>	<u>Increase from Corrections</u>

Version 3.6 (Updated April 20, 2024) Created by LDCR Michael Hunt, Clinton Indian Health Center, Clinton, OK

Change Healthcare Cardfinder Service

eRx Network
INNOVATIVE SOLUTIONS FOR PHARMACY

CardFinder is an industry-leading, real-time eligibility service that can help your pharmacy save valuable personnel time and, as a result, provide enhanced customer service. A single transaction quickly returns commercial coverage information for more than 270 million covered lives and Medicare Part D coverage information for patients 65 years of age or older.

CardFinder also works with eRx Network's ePrescribing solution to further improve your pharmacy's workflow by performing automatic, real-time eligibility inquiries for new prescriptions.

→ To enroll: email pharmacyservices@qs1.com or call 800.845.7558, ext. 1471.

🌐 <http://www.erxnetwork.com/>

Change Healthcare Cardfinder Service

Change Healthcare Cardfinder Service

<https://secure.erxnetwork.com/NS/Cardfinder/CardFinder.aspx>

Cost involved

- Must have local contract in order to utilize PRIVate insurance eligibility check.
- Cost is \$25 per month, plus \$0.025 for every positive lookup

Well worth the price. It could pay for a lifetime of its use in the first month.

For questions regarding acquisition of a Cardfinder account for your site, contact Change Healthcare support at:

<https://secure.ERXNetwork.com/Public/Contact.aspx>

Phone support for pharmacy staff:

[E: Nathan.Ludvigson@changehealthcare.com](mailto:Nathan.Ludvigson@changehealthcare.com)

Search VGEN list through Cardfinder

Results from VGEN report are entered individually into Change Healthcare Cardfinder.

Positive lookup is then either.....

- entered into RPMS, if associate is trained to do so.
- printed for entry by trained personnel. This allows teamwork to help speed the process.

If pharmacy insurance is entered, registration should be notified so that an assignment of benefits (AOB) can be obtained from the patient and the medical insurance can be entered to avoid leaving any 'money on the table'.

VGEN Search Impact on Collections:

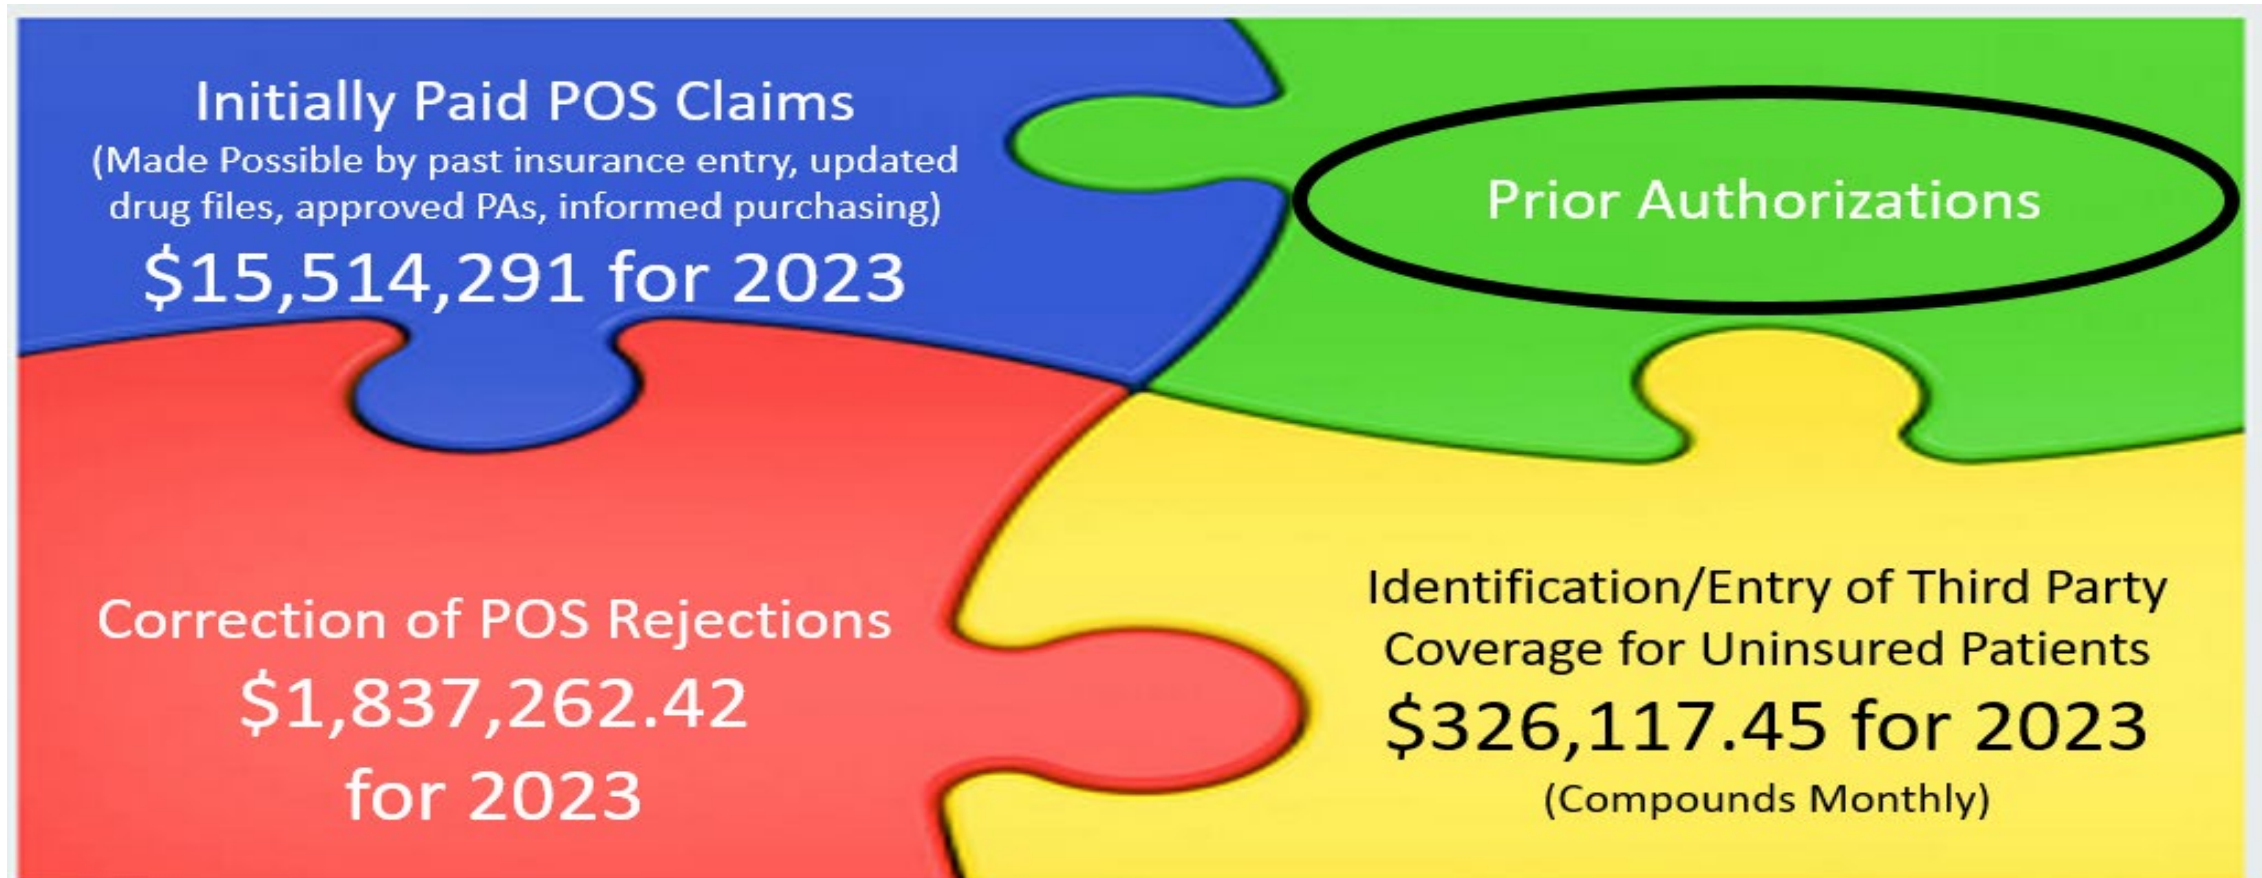

- *This only includes back billed claims at time insurance is found.
- *Impacts recur monthly while insurance is active.

#3: Prior Authorizations

Prior Authorizations

Retail: Prior Authorization is initiated by the pharmacy and completion is the responsibility of the doctor's office, with the **patient being the driving force** to urge the completion of the Prior Authorization. If not approved, the patient is responsible for paying the full amount or having the prescription changed.

Indian Health Service: Prior Authorization completion is usually the responsibility of the pharmacy. **The driving force is the pharmacy to increase third-party collections.** Patient is usually not impacted as they will receive their medication at no cost. Often PA's are done after the patient has already received and started their medication. However, PA's can often be backdated up to 30 days with a phone call to the insurer.

Initial Rejection Types that Might Require a PA

22:M/I Dispense As Written(DAW)/Product Selection

569:Provide Beneficiary with CMS Notice of Appeal

608:Step Therapy, Alt Drug Therapy Required

70:Product/Service Not Covered

75:Prior Authorization Required

76:Plan Limitations Exceeded

MR:Product Not On Formulary

R6:Product/Service Not Appropriate For This Location

Covermymeds

- Free website for Prior Authorization completion for most third-party plans.
- Search for forms by entering BIN, PCN, and GROUP numbers.
- Website stores patient, prescriber, and pharmacy information once it is entered.
- Greatly speeds the PA process through online completion. May receive immediate response in some cases.
- Stores outcomes of PA's to show trends of which meds are normally approved/denied.

POS Tutorial: PRIOR AUTHORIZATIONS Tab

The screenshot displays the CoverMyMeds website interface. At the top, the logo "covermymeds" is prominently displayed. Below the logo, a tagline reads: "Free service to complete Prior Authorizations (PA), Formulary tiering exceptions, quantity limit overrides, etc." A paragraph of text explains the service: "Simply go to the home page and click **CREATE A FREE ACCOUNT**. At our site, we have listed ourselves as the **PROVIDER'S OFFICE** so that we can complete the PA's, with the provider's approval, to streamline the process. This way you will see all correspondence and can better manage your prior authorizations. Covermymeds site will save provider, pharmacy, and patient entries to speed entry of future prior authorizations. It also will save completed PA's, with outcomes, to help you track your success/failures." Two links are provided: "Covermymeds home page:" with the URL <https://www.covermymeds.com/main/> and "Cover My Meds tutorial video available at:" with the URL https://www.covermymeds.com/?video=complete_a_pa.

The main content area features a navigation bar with the following items: "ACCOUNT LOG IN:" with fields for "Username" and "Password" and a "Log In" button; "QUESTIONS: 1-866-452-5017"; "CREATE A FREE ACCOUNT"; and "RECEIVED A PA REQUEST? ENTER KEY". Below this is a secondary navigation menu with links for "ABOUT", "ePA SOLUTIONS", "ePA SCORECARD", "PRESS", "HELP", "CONTACT", and "DEVELOPERS".

The central message is "Integrated ePA functionality for EHRs", stating: "CoverMyMeds seamlessly integrates with EHR systems to provide hospitals and providers with ePA functionality at the point of prescribing." A button labeled "Learn about our EHR Solution" is positioned below this text. A horizontal bar contains four categories: "EHRs", "Plans & PBMs", "Pharmacy Systems", and "Providers & Pharmacists".

At the bottom, a navigation bar highlights the "PRIOR AUTHORIZATIONS" tab in green. Other tabs include "Setup", "Daily Tasks", "Reject List", "CODES", "Eligibility Search", and "SETUP OF INS".

Impact from Completion of prescription Prior Authorizations (PA)

Initial Collections

Totals repeat with each refill

FY 2023					
<u>Month</u>	<u>PA's approved</u>	<u>Initial Collections from PA Approval</u>			
Oct, 2022	86	\$50,661.13			
Nov, 2022	74	\$41,107.10

Our Puzzle is now Complete

Pharmacy Point of Sale (POS) Staff

Point of Sale Pharmacist:

Oversee pharmacy POS billing operations

Ensure drug files are updated with current NDC for proper billing (AVOID REPACKAGED PRODUCTS WHEN POSSIBLE)

Provide clinical oversight while working rejections and completing prior authorizations

Ensure good communication between revenue generating departments

Be trained in all tasks performed by POS Technicians listed below

Point of Sale Pharmacy Technician(s): Number dependent on volume.

Current *Resource Requirements Methodology* (RRM)= 1 Full Time Employee/500 claims daily

With multiple employees, tasks can be divided to speed the process

- Work POS rejections by entering overrides
- Complete prior authorizations
- Search/identify/enter insurance for uninsured by using online search tools

Financial Return on POS Staff Investment

Clinton Service Unit 2023 Totals	
Correction of Rejections	\$1,837,262.00
Prior Authorizations	\$469,116.00
<u>Identification and Entry of Insurance</u>	<u>\$326,117.00</u>
Total	\$2,632,495.00
Increase from POS Efforts	\$2,632,495.00
POS Pharmacist Salary (overestimate)	-\$200,000.00
<u>GS-7 POS Technician Salary (overestimate)</u>	<u>-\$90,000.00</u>
Net Return on Staffing Investment	\$2,342,495.00

Typical Pharmacy Billing Tasks by Department

Pharmacy POS Team (Pharmacy)

- Fixing of rejections by entering overrides
- Completing prior authorizations
- Searching for active coverage on cardfinder, entering the pharmacy coverage, and back billing of the claims
- Online Medicaid DME billing for nebulizers

Billing clerk (Business Office)

- VA claims are processed on electronic paper claims
- Create claims to match Nebulizers billed online in pharmacy

Accounts Receivable clerk (Business Office)

- Reconcile and post payments received from third party payers

RPMS Keys Required for Different Departments

Pharmacy Point of Sale-All Point of Sale users

- ABSPZ Insurer
- ABSPZ Reports
- ABSPZ User
- ABSPZMenu (no space)
- AGZVIEWONLY
- AGZEDITPAGE4
- AGZEDITPAGE5
- AGZEDITPAGE8

Additional keys for POS Manager/Pharmacist

- ABMDZ TABLE MAINTENANCE-If performing DTFE
- ABMZMENU
- ABSPZ Manager

Billing clerk (Business Office)

- ABMZMENU

Accounts Receivable clerk (Business Office)

- BARZMENU

Satisfying the Need for Training

Recorded trainings are available:

Differences Between Medical & Pharmacy POS Billing

Medical Claims

- **Automatically generate** when new medical coverage is added
- Have a longer backbilling window than pharmacy claims
- Take longer to be billed, receive a response, and be posted in Accounts Receivable (A/R)
- Require a signed Assignment of Benefits (AOB) or Medicare Secondary Payer Questionnaire (MSPQ), depending on coverages

Differences Between Medical & Pharmacy POS Billing

Pharmacy Point-of-Sale (POS) Claims

- **Do not automatically bill, but new ELFC function identifies and bills these claims**
- Bill in just a few seconds displaying the amount we should be paid, then payment from insurer comes two to four weeks later
- Have a backbilling window of 90 to 180 days, depending on insurer
- Payments are then reconciled by A/R

Eligibility Found for Unpaid Claims Report

- Until the advent of ELFC, pharmacy claims did not automatically back bill when active insurance is added later. They remain with a NO INSURANCE message in the POS package until manually back-billed.
- If communication to pharmacy billing staff does not occur, these claims often remain unbilled. Additionally, back billing and communication processes are manual and time-intensive
- Even when communication efforts are made between insurance entry and billing staff (shared spreadsheet, phone calls, GUI Insurance Update Schedule, etc.), claims still get missed and revenue opportunities are lost.

ELFC- Eligibility Found for Unpaid Claims Report

SPECIAL THANKS TO THE OIT ABSP TEAM FOR MAKING THIS POSSIBLE

Purpose:

To identify and back-bill prescription claims for patients who, at the time of filling, did NOT have pharmacy insurance on file, but had active coverage that was added after prescriptions had been filled.

ELFC Task: (Setup in RPMS to run nightly)

Compares coverage dates for newly added insurance to Rxs within the last year (or 2 years for NM Medicaid) that have not been submitted to insurance (NO INSURANCE). Identified Rxs are placed on a report and automatically back-billed by ELFC task.

ELFC Impact (Automated PPOS Backbilling)

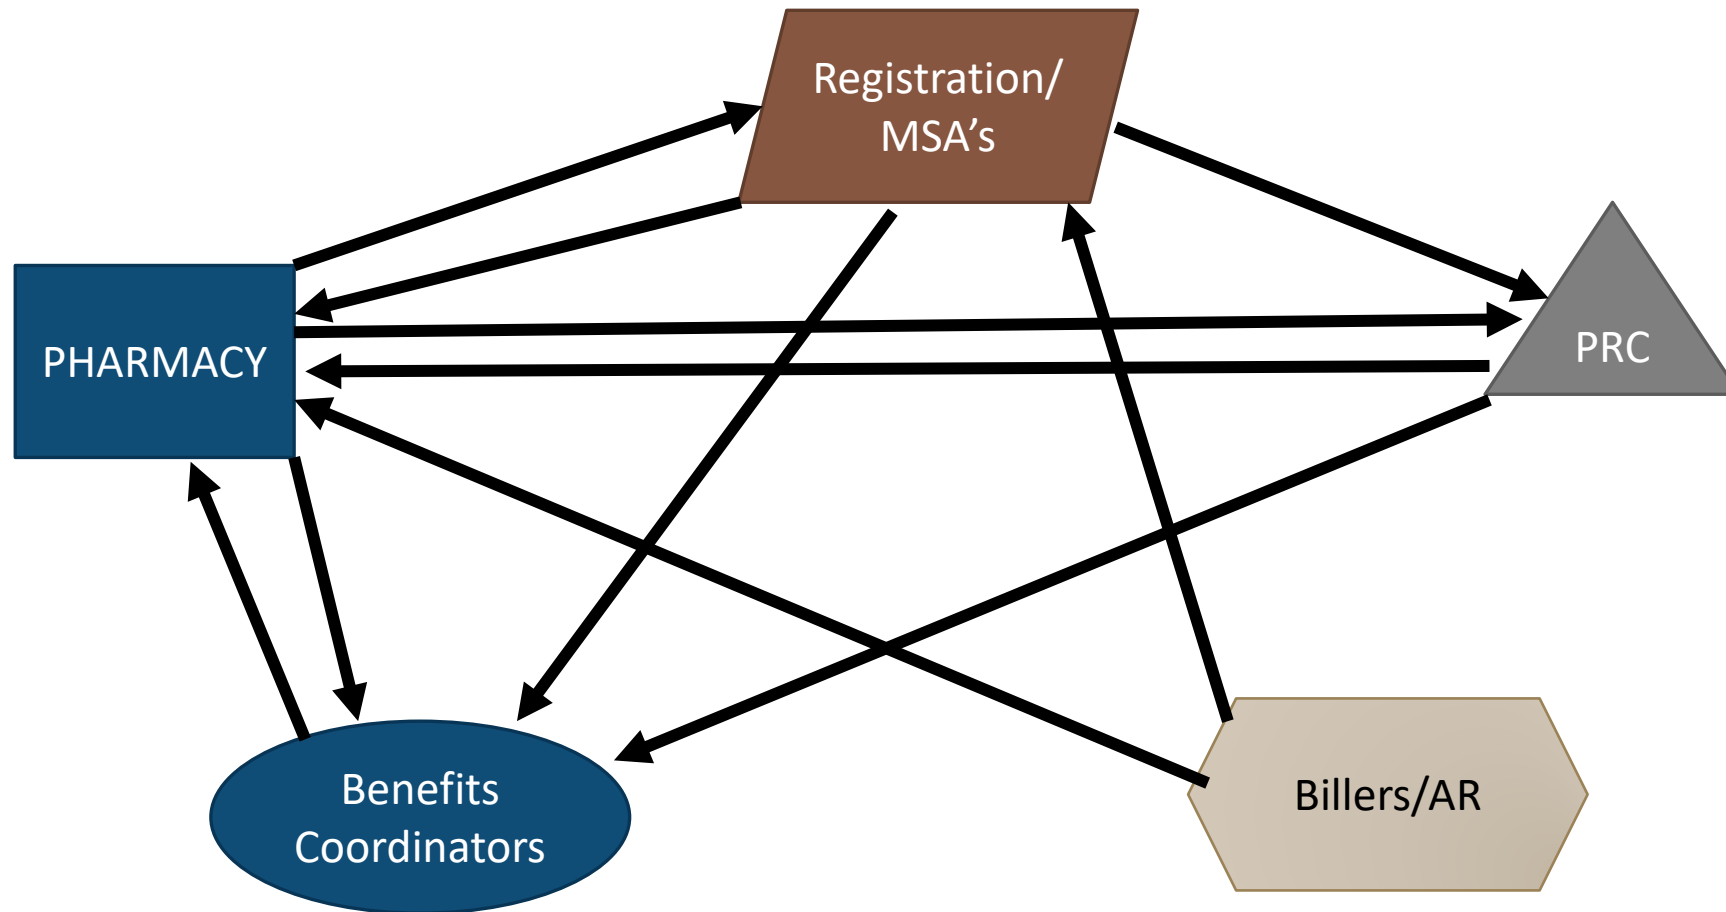

ELFC was released with ABSP Patch 57 in Dec. 2025.

As of 3/24/2026:

- **33 sites collected an approximate total of \$10 million**
- Site reporting highest impact totaled \$1.1 Million
- Next highest site collected \$850K
- 3 sites have collected in excess of \$600K

Examples of Interdepartmental Teamwork

Two-way Communication Between Pharmacy and Registration

Registration communicates with Pharmacy

- Registration alerts Pharmacy when a new pharmacy insurance is entered so that pharmacy can backbill claims

Pharmacy communicates with Registration

- Pharmacy lets Registration know when pharmacy insurance is found, so they can research/identify medical insurance, gain the proper documents (AOB, MSPQ, etc.), and add the medical insurance
- Pharmacy lets registration know of any issues that may need updating on a patient's file (address, phone number, dependents, etc.)

Two-way Communication Between Pharmacy and Benefits Coordinators

Benefits Coordinators communicate with Pharmacy

- Benefits Coordinators (BC) let Pharmacy know when new coverage is added (i.e., recently obtained approval for Oklahoma Medicaid)
- This will alert Pharmacy to backbill POS claims

Pharmacy communicates with Benefits Coordinators

- Pharmacy notifies Benefits Coordinators when either Medicaid has termed on a patient, or if a patient is dual eligible for Medicare and Medicaid, but has no Part D plan
- This can increase collections by renewed coverage/acquisition of Medicare Part D plan
- It can help BCs on their PMAPs by increasing encounters for benefits coordinators

Two-way Communication Between Pharmacy and Purchased Referred Care (PRC)

PRC communicates with Pharmacy

- PRC can notify Pharmacy when new coverage is identified/entered so pharmacy can backbill claims

Pharmacy communicates with PRC

- Pharmacy can notify PRC when a patient updates their address
- This can sometimes place the patient outside of our Purchased Referred Care Delivery Area (PRCDA), which can affect PRC coverage/payments

Two-way Communication Between Pharmacy and Billers/Accounts Receivable (AR)

Billers/AR communicates with Pharmacy

- Billers/AR notifies pharmacy when new coverage is added/identified to alert pharmacy to backbill POS claims.

Pharmacy communicates with Billers/AR

- Pharmacy diligently provides information regarding any billing issues
- Informs billers when Nebulizer is billed as DME online through Oklahoma Medicaid so that a bill can be created to match up with the payment that will be received

Two-way Communication Between Pharmacy and the Business Office Manager (BOM)

BOM communicates with Pharmacy

- BOM can notify pharmacy when a new plan is entered so pharmacy can complete the POS settings to ensure proper billing

Pharmacy communicates with BOM

- When rejections occur that alert when a provider's Medicaid contract has expired
- Paper claims are occurring when medical plans may be set up incorrectly
- New plans/groups are identified on Cardfinder as active for a patient but are not in our system.

Possible Tools to Improve Communication

- Shared spreadsheet
- INSURANCE UPDATE schedule created in GUI/Moonwalk
- Create a group in Microsoft Teams or WebEx
- Notepad
- Phone call
- Passenger pigeon 😊

Shared Spreadsheet on S Drive Lists Patients Who May be

Insurance Update Schedule Created in GUI/Moonwalk

Create appointments for patients that need updating

The screenshot displays a software interface for creating appointments. On the left, a list of clinics is shown under the heading "CLINICS". The "INSURANCE UPDATE" clinic is selected, indicated by a blue checkmark in a box. Below the clinic list are two menu items: "Registration" and "Scheduling", with "Scheduling" being the active menu. The main area is a scheduling grid with a vertical time axis on the left showing 05 AM, 06 AM, and 07 AM. A light blue horizontal bar is present in the 07 AM slot, labeled "UPDATE".

Time	Appointment
05 AM	
06 AM	
07 AM	UPDATE
08 AM	

Microsoft Teams or WebEx Groups

Additional Tools to Improve Communication

- Notepad with chart numbers jotted down (low tech, but very effective)
 - Have a system for pharmacy to go pick up the list daily/weekly
- Phone call to/from Patient Registration to/from Pharmacy
- Passenger Pigeon

Important Pieces

An incomplete puzzle is just that...incomplete. It is found lacking, and is not nearly as impressive as it could potentially be once all the pieces have been added. This is not how healthcare was meant to be.

Placing emphasis on a strong Pharmacy Point of Sale team can not only help achieve the goals of your site, but may lead to the addition of pieces you had not previously imagined. Many sites have experienced facility updates, new service additions, technological advancements, and increased job opportunities as a result of a dramatic increase in Pharmacy POS collections. All of which help **“to raise the physical, mental, social, and spiritual health of American Indians and Alaskan Natives to the highest level.”**
